

A reconditioned nib is a vintage nib that has been restored to new condition by installing new iridium on the writing surface of the tips of the nib tines. John Mottishaw (<http://www.nibs.com/>) is the world's expert at re-tipping as well as virtually any other nib repair that you may require. All reconditioned nibs in the pens that I sell have been reconditioned by John. For pics of some of his beautiful work go directly to: <http://www.nibs.com/beforeandafter.htm>
